

Renaserv

Optimize.
Innovate.
Achieve.

Renaserv comprises of Engineering Services in the Oil and Gas sector. We have partnered with more than eight International service companies around the globe and hired experts with longest experience in Yemen's oil and gas fields to provide our clients with the best quality services for their operations.

With the increasing challenges which are facing us in the oil and gas industry, where not only are new reserves harder to reach, but also projects are becoming increasingly complex, new technologies, security challenges, tight project schedules, and increased legal, commercial, and environmental requirements, RENASERV comes with innovative solutions which have proved to be reliable and cost effective.

IN A GLANCE

As one of the leading service providers for the energy sector in Yemen, we can help you in all your oil and gas extraction and refinement project with our services which include:

○ **Upstream Services:**

- Reservoir Analysis and Feasibility Studies
- Well planning and BHA designs
- Well Surveying With Gyro Tools
- Drilling Tools
- Casing running

○ **Downstream Services**

- Pipeline services and Storage facilities maintenance
- Catalyst Handling

○ **Training and Certification:**

RENASERV are partners of OGS(OIL GAS SKILLS) , one of the biggest Oilfield training centers in the MEA

○ **Inspection Services**

RENASERV has the Exclusive agency in Yemen for Lloydsbritish- the international experts of Inspection

○ **Other Services**

- Oil Field Software's and Licenses
- Global Sourcing and Logistic Services

Renaserv

UPSTREAM SERVICES

Reservoir Analysis, Well planning and BHA designs

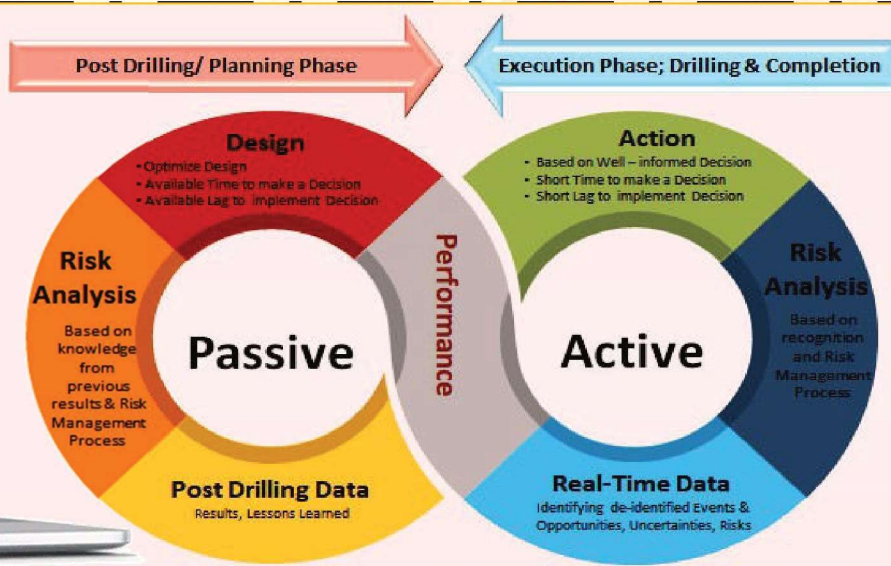

Reservoir Analysis RenaServ provides Reservoir Analysis and

Feasibility Studies via its partner OGS. By utilizing technologies , Experience and modern mothed. We can control your costs and optimize your production

Well Planning and BHA Design

Whether you are planning to produce from the basement, sandstones or limestones , we can help you plan the optimum trajectory with the best well designs based on

- Drilling Engineer with more than ten years planning and designing wells for all operators in Yemen
- Torque and drag analysis
- BHA designs for better ROP and Least Risks

Renaserv

UPSTREAM SERVICES

Well Surveying

Surveying with Gyro tools

We use the EZ-GYRO™ to ensure highly accurate data is collected and to provide the secure transmission of the data to the end user.

- Seeks out True North with no risk of magnetic interference
- Fast and accurate vertical and angled orientation of bottom hole assemblies without the risk of magnetic interference.

Applications

- Orientation of Whipstocks
- Surveying areas with high magnetic interference

The REFLEX EZ-GYRO™ is connected to the award winning cloud-based IMDEXHUB-IQ™, offering a streamlined data solution including secure chain of custody and QA/QC, and real-time access to drilling data.

RenaServ

UPSTREAM SERVICES

Casing Running Tools

Casing running tools provide a mechanized, safe and cost-effective way to run and make-up casing. There are many benefits to adding a Casing Drive System™ (CDS™) to a drilling operation.

First, the purpose of every CDS™ model is to provide automation of running casing and ensuring that casing reaches bottom without fail. It has been proven that pipe rotation and reciprocation while cementing helps to achieve a more reliable and secure cement job. RenaServ uses Canrig® casing running tools provide the ability to rotate, circulate, and reciprocate pipe simultaneously during cementing operations.

Oftentimes, casing running tools are only utilized in cases when pipe is stuck downhole. Canrig® CDS™ tools can certainly handle challenging situations such as stuck pipe; however, the CDS™ is built for more. It works with the top drive to easily attain smooth make up with no bending load and with precise control on final torque. Rig up a CDS™ from the beginning of any job and achieve the cost-saving and productivity yields throughout the casing or cementing processes.

Renaserv

DOWNSTREAM SERVICES

At Renaserv, we possess the expertise and experience in supporting clients in the downstream sector as they work to ensure their products are as desirable as possible.

Our downstream oil and gas services include, but are not limited to, industrial technical inspection, asset integrity anagement, petroleum testing, refining and distribution, hazardous location equipment testing and database software solutions.

Our services includes:

- Pipeline services and Storage facilities maintenance
- Catalyst Handling

We are major supplier for the following.

- Mono Ethylene Glycol-MED (Origin: Saudi Arabia).
- Methanol (Origin: Saudi Arabia).
- Xylene (Origin: Singapore).
- Heat Transfer Fluid (Origin: UK).
- Castrol Offshore Control Fluids (Origin: UK).
- Castrol SPD Lubricants (Origin: UK)

Renaserv

OGS (OIL & GAS SKILLS) is one of the biggest oil and gas training centers in the Middle east.

- World wide approved certified trainings, Certifications and trainers in Oil industry
- 25 Fully equipped Training Rooms
- Simulation rooms with equipment similar to the field

Hundreds of training courses and certifications in :

- Upstream
- Midstream
- Downstream
- Safety and Environment
- Management and Leadership

ASK FOR THE UPDATED TRAINING SCHEDULE

DOES YOUR TEAM HAVE THE UPDATED CERTIFICATES FOR WORK?!!

Pursuit of Excellence

Constantly provides best services to achieve customers' satisfaction and exceed their expectations

OGS
OIL & GAS SKILLS

Training and Certification

RENASERV has an Exclusive Agency from OGS (Oil & Gas Skills) for representing it in Yemen

RENASERV Coordinates with OGS to provide its Clients with two Oil and GAS Training and Certification Plans

Option A

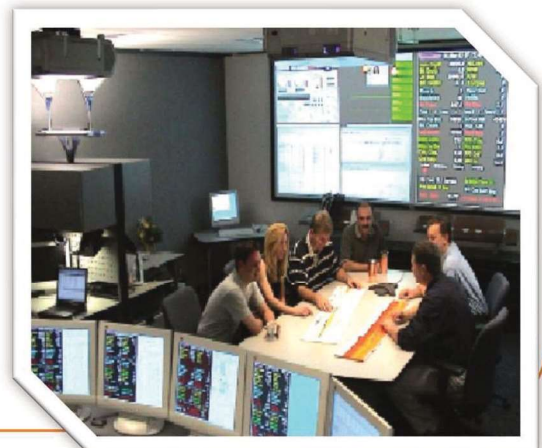

Bringing a certified to Yemen Trainer to Provide our clients with a training course in a Training Hall in one of the best Hotels in Aden or Mukalla

Option B

Renasev Coordinates with OGS to provide our clients with the training needed in OGS Training center in Cairo. This includes

- Travel documents and flight booking
- Accommodation in a five star Hotel
- Transportation from Airport Hotel and OGS training center

Renaserv

INSPECTION SERVICES

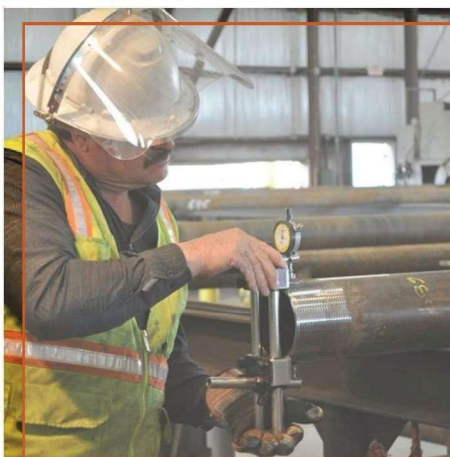

Renaserv Coordinates with LLOYDS BRITISH for all the inspection services provided to our clients.

In the 200 years since being formed, Lloyds British has become the national leader in providing inspection, testing, and certification services, as well as becoming renowned for their lifting and handling solutions

Services included

- Inspections
- Rig Audit
- Mechanical testing
- Certification
- Repair services

**LEAVE NOTHING
TO CHANCE.**

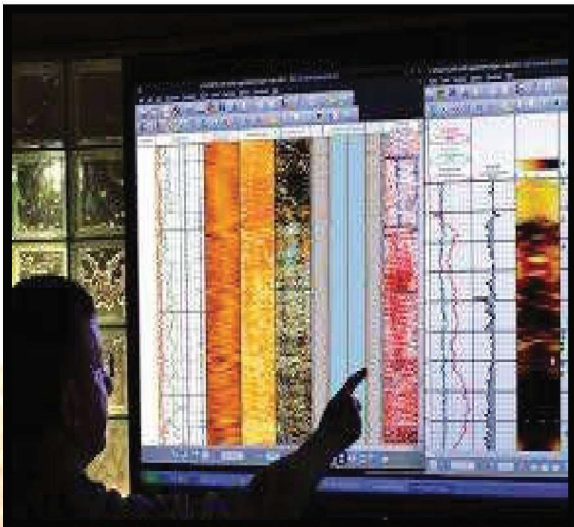

Renaserv

OTHER SERVICES

Renaserv

Oilfield Software's and Licenses

Renserv Provides several Oilfield Software's. At the same time it coordinates with major service companies to update the licenses of their software's being used by Renaserv Clients.

Global Sourcing and Logistics Services

By utilizing our office in Gabal Ali- UAE, Renaserv brings all your international demands and procurements into your hands. Whether you need spare parts or Material and supply, we make it all available...
